# A hospital for the future

PALMERSTON Regional Hospital is the Northern Territory's first new public hospital in almost 40 years. The \$170 million facility has been jointly funded by the Northern Territory and Federal governments. It is built on 45 hectares al-

lowing for future expansion. Palmerston Regional Hospital will operate as a campus of Royal Darwin Hospital and as part of the integrated network of public health services across the Top End.

Royal Darwin Hospital will support the services delivered at Palmerston Regional Hospital and will remain the Top End's only tertiary hospital providing major emergency, specialist and critical care services for Territorians.

Lead medical, nursing, allied health and support staff have been involved in planning and designing the best service model for Palmerston Regional Hospital to determine what services can safely be provided.

Hospital

**We're  
working  
together**

Working with Royal Darwin Hospital the new hospital will care for patients as part of the Top End Health Service network.

The new 116-bed hospital will have a 24/7 emergency department.

It will provide day surgery and general medical care.

It will also specialise in rehabilitation, and has a leading-edge Geriatric Evaluation and Management Unit.
